**BANCTEC'S MARK FAIRCHILD TO DELIVER ADDRESS AT TAWPI'S
PAYMENTS IN TRANSITION CONFERENCE**

Conference attendees also slated to visit BancTec customer
Las Vegas Valley Water District

DALLAS April 11, 2008 – Mark Fairchild, senior vice president and chief technology officer for BancTec, a global provider of advanced, high volume document and payment processing services and solutions, will deliver one of the featured presentations at TAWPI'S 2008 Payments in Transition conference, which will be held April 15-16, 2008 at the Westin Casuarina Las Vegas Hotel, Casino and Spa.

During the conference, registered attendees will also have an opportunity to view BancTec solutions in operation during a site tour at the Las Vegas Valley Water District, which is utilizing the company's PayCourier® and PayCourier® Archive solutions to help it process approximately 125,000 payments each month. BancTec representatives will be at the show to discuss this solution, as well as others for remittance processing, accounts payable automation, mailroom automation, business process management and remote capture.

Mr. Fairchild's presentation will explore the opportunities and challenges related to the convergence of document processing and payments automation. Attendees will learn how organizations must develop a new vision for capturing, processing, managing, archiving and delivering mission-critical information. Specifically, Mr. Fairchild will talk about the increasing diversity of the payments mix; extending the boundaries of processing environments; integrating and collaborating among traditional organizational silos; and positioning organizations to compete.

"BancTec offers a robust solution suite that is helping companies save time and money in their payment processing operations, while finding new ways to leverage the hidden value in their backroom processes," said Fairchild. "We look forward to sharing some of our insights developed in working with many companies, such as the Las Vegas Valley Water District, to improve and automate their document and payment processing capabilities."

TAWPI (The Association for Work Process Improvement) is a membership association dedicated to helping practitioners in the payments automation, distributed capture, and imaging and forms processing arenas maximize their value as professionals, enhance operations efficiency and effectiveness, and position their organizations for success in the future. The mission of the Payments Capture and Clearing (PCC) Council is to identify, understand, and contribute to the development of payment channels and clearing options that will benefit the future direction of payment processing operations.

About BancTec
